

PAS 68 HVM Static Terra Mars Bollard - 7.5t At 50 mph

Generated on 28.03.2020

Detailed description

The Static Terra Mars Bollard is a Hostile Vehicle Mitigation (HVM) Terra Bollard which has been impact tested to the British PAS 68 Specification, stopping a 7.5 tonne vehicle travelling at 50 mph.

PAS 68 Classification Code: V/7500[N2]/64/90:4.0/16.7. Impact tested in a set of three bollards.

A range of sleeves finishes and tops also available.

Static HVM Terra Bollards have been proven to stop vehicles, providing HVM (Hostile Vehicle Mitigation), counter terrorist, impact-resistant barriers preventing Vehicle as a Weapon attacks.

All made to order. A PSSA Verified Product, Secured by Design and are listed on the CPNI List of IWA 14 and PAS 68 products.

Removable model available - please see Removable Static Terra Bollards.

Applications:

Suitable for high security sites where a complete HVM Perimeter is required, and public realm, crowded places and/or pedestrianized areas where vehicles are not permitted. static HVM Bollards are also used between automatic HVM products to ensure the installation meets PAS 69 installation guidance of 1.2 m maximum distance between upright faces.

Product guidance - As Standard

Distance between uprights (maximum):

For the International PAS 68 Impact tested bollards to be installed in accordance with PAS 69, bollards should be installed with 1200 mm between upright bollard faces.

Lifted height/ height above ground:

1000 mm.

Diameter:

219 mm.

Foundation requirements:

650 mm.

Options

Finish:
